Batch: 2021-2025

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Abstract

- This project is about creating a website made for students to access everything related to their studies in one place.
- In today's digital education system, students need an easy, organized and user-friendly platform to get study materials , share content and learn together.
- The main goal of this project is to provide a centralized hub where students can find and share notes, assignments, lecture slides, question papers and other resources in a structured way.

Problem Statement:

- Study materials are scattered on different platforms.
- Information is often incomplete or outdated.
- No proper guidance
- Poor progress tracking

Objectives:

- To create a **centralized platform** for all study materials.
- To provide **updated and reliable content** to students.
- To offer **personalized guidance using AI** based recommendations.
- Allow to **track progress** of student.
- To **generate slides** from the text.
- To integrate **RAG** for providing students with AI-powered, context-aware answers from study resources.

Scope of the Project:

- To provide a common platform for all study materials like notes, assignments, and question papers.
- To include smart features for study recommendations and progress tracking.
- To allow flexible access on mobile devices and offline mode.
- Using modern web technologies to ensure fast performance, data protection, and room for future expansion into more courses and features.

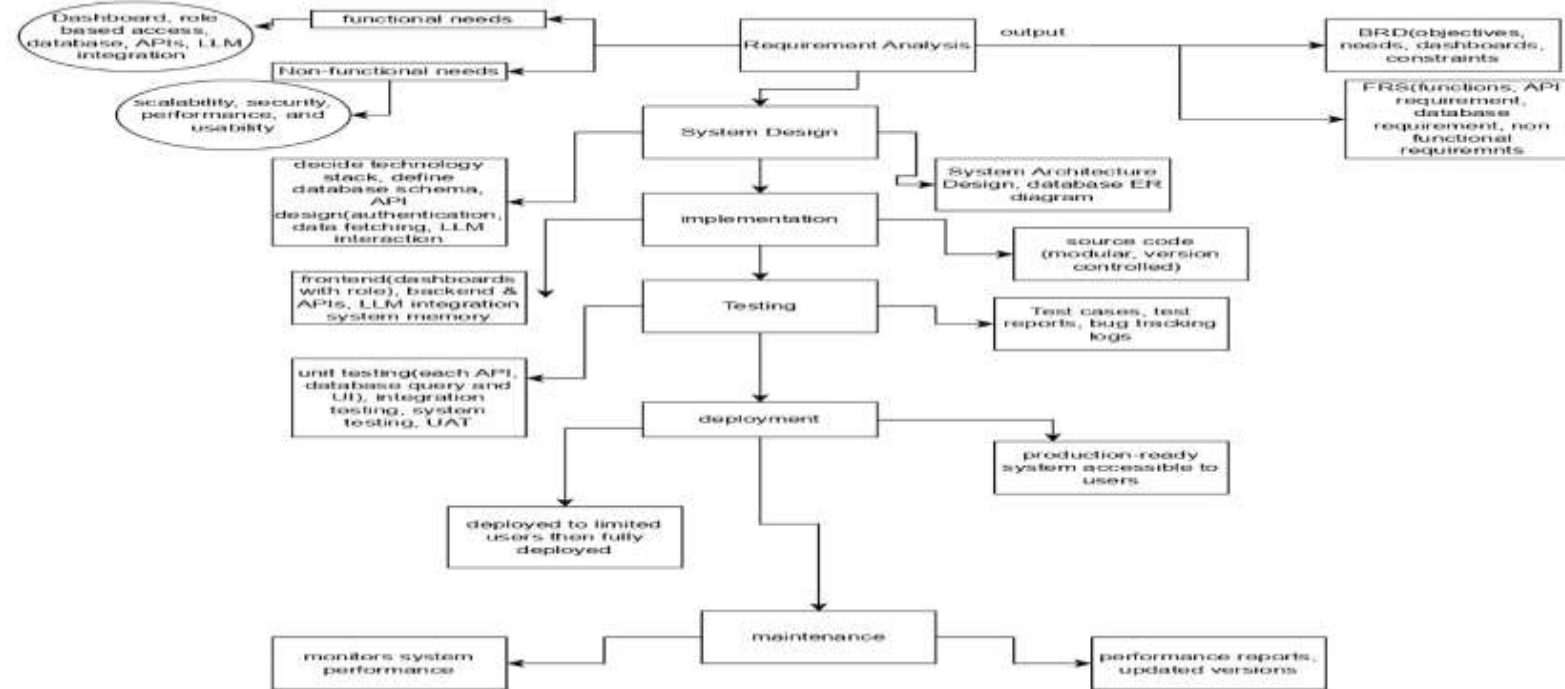

Literature Survey:

S.NO	PORTAL	CORE VALUE	PRICING	CONTENT TYPE	IDEAL FOR
1.	Khan Academy	Free foundational education	free	Video, quizzes	K-12, entrance preparation
2.	Coursera	Accredited certificates & degrees	Paid/free	Video, peer assignments	College, skill learners
3.	edX	University-level	Paid/free	Video, assignments	Higher Ed, AP students
4.	Udemy	Wide course variety	Paid	Video, projects	Hobbyists, professionals
5.	Quizlet	Memorization	Paid /free	Quizzes, flashcards	All students

Literature Survey

S.NO	PORTALS	CORE VALUE	PRICING	CONTENT TYPE	IDEAL FOR
6.	Google Classroom	Course management	Free	Docs , assignments	School /college students
7.	LinkedIn Learning	Workplace skills	Paid	Video modules	Professionals, students
8.	MIT OCW	Open university materials	Free	Syllabi , lectures	Advanced students
9.	NPTEL	Tech & Engineering focus	Free	Video, assignments	Indian college students
10.	SWAYAM	Indian curriculum, openness	Free	Varied, multi-language	Indian students, faculty

Proposed Methodology:

Tools and Techniques:

- **Hardware** : PC
- **IDE** : PyCharm
- **Database** : PostgreSQL
- **Frontend** : HTML, CSS, React.js
- **Backend** : Django
- **AI** : LLM model
- **APIs** : YouTube APIs

Conclusion:

The Student Study Portal makes learning easier by bringing all study materials, assignments, and notes into one place. With AI features, it gives smart suggestions, tracks progress, and improves learning step by step. Using modern technology, the portal is reliable, easy to use, and helps make education more organized, accessible, and effective
